

Securus
Safeguard Monitor Protect

Berger Primary School Case Study

Berger Primary School in Hackney

The thriving community school ensures that all pupils achieve their best and supports them to develop skills and build knowledge so that they become resilient, creative and independent learners. The school self-manage the Securus capture portal and key staff monitor activity for incidents of concern. Here is what the school had to say about Securus!

"Securus records and logs all incidents. When the safeguarding team are alerted to an incident, they respond immediately and have a discussion with the pupil about how they put themselves into a situation where they may be accessing potentially harmful material".

What are some of the key advantages of having Securus in place to monitor activity at your school?

- It has allowed us to immediately respond to incidents
- It allows the school to keep specific records of all incidents
- It integrates easily with CPOMs

Julie Barry
Deputy Headteacher

“

How has Securus safeguarded pupils in line with your school structure and policies?

It has allowed us to monitor and by changing the settings filter the information children receive whilst using computers..

”
